

REMARKS/ARGUMENTS

The application is subjected to a two-way restriction requirement in the captioned Office Action.

In response applicant has above elected the restriction Group II claims, claims 9-12, for present examination on the merits. Applicant also submits herewith a new group of eleven claims, two of these being independent in nature, for examination. Applicant has carefully considered these new claims in hope of avoiding the need for additional restriction of the application while also providing additional protection of the invention over the four claims in the group elected for examination.

Applicant also herein requests amendment of the application title and several paragraphs in the application specification in order to provide language appropriate to the now revised nature of the application and to identify the related other applications.

In view of the accomplished present election and this brief explanation of the actions included in this document the application is believed to be in condition for examination on the merits and for allowance. Such examination and allowance at the earliest possible time are therefore respectfully solicited.

Respectfully submitted,

*Gerald B. Hollins*
